

ARKAMYS

Arkamys premium in-car entertainment experience with Dolby Atmos at CES 2023

Las Vegas, January 5th, 2023: Arkamys, the leader in audio signal processing for automotive is proud to announce an in-car Immersive Lab experience with Dolby Atmos® at CES 2023.

The compliancy of Arkamys' modular premium SoundStage audio software with Dolby Atmos for cars offers a whole new immersive audio experience to the automotive world.

The demonstration with Dolby Atmos offers an extraordinary 3D sound rendering in an 18-speaker premium SUV. The in-car demonstrator showcases a Dolby Atmos playback adapted to the car cabin acoustics, reproducing with high fidelity the creative vision of the artists.

By integrating the Arkamys SoundStage processing, the Dolby in-car experience offers a sound environment that has been perfectly crafted to showcase the richness of Dolby Atmos immersive sound with greater details, clarity, and sound separation. Drivers and passengers feel like they're at the center of the content they love.

“Working with Dolby Atmos for cars allows us to demonstrate how Arkamys audio software solutions can enhance the best audio quality content and allow users be immersed in the music they love”- said Guillaume Luiggi, CEO of Arkamys.

Book your demo at our booth at LVCC Central Plaza. Booth #CP-29: ces2023@arkamys.com
